

Product Description and Specification

Name:	Arizona River Pebbles
Geology:	River rock cobbles
Color:	Multi-color blend of mauve, plum, burgundy, lavender-colored stones
Description:	Arizona River Rock is known by its smooth round profile, it has very smooth edges and surfaces, evoking an image of stones worn by centuries of cascading water. This rock is also called Salt River Rock Cobbles and Pebbles. These Beautiful naturally rounded river stones are most commonly used in dry river beds. Its soft shapes and textures make it perfect for your desert river bed landscape. With its serene appeal, Arizona River Rock adds a natural touch to applications such as dry river beds, standard landscape fill, paths, and walkways. Stones range in diameter from approximately 3/8" to 18".
Descripción:	La roca de río Arizona se caracteriza por su perfil liso y redondeado, con bordes y superficies muy lisos que evocan la imagen de piedras desgastadas por siglos de cascadas. Esta roca también se conoce como adoquines y guijarros de roca de río salada. Estas hermosas piedras de río, naturalmente redondeadas, se utilizan con mayor frecuencia en lechos de ríos secos. Sus formas y texturas suaves las hacen perfectas para el paisaje de lechos de ríos desérticos. Con su atractivo sereno, la roca de río Arizona añade un toque natural a aplicaciones como lechos de ríos secos, rellenos de paisajismo estándar, senderos y pasarelas. El diámetro de las piedras varía entre 3/8" y 18" aproximadamente.
Transportation:	Orders shipped on flatbeds
