Black Academy Granite Boulders

Product Description and Specification

Name: Black Academy Granite Landscape Boulders

Origin: Central California Rock Quarry

Geology: Granite/Gabbro

Color: Black to Dark Gray

Description: Academy Black Granite, a premium black "granite" rock. This material is exceptinal for its quality of color, hardness, and workability. We hand-select these black granite boulders from the quarry. This rock material is very expensive and not for most budgets. Academy granites vary from almost black to dark gray. The dark gray-to-black color of the granite allows for excellent contrast between polished and unpolished faces. The dark gray to black granite at Academy was formed by magma slowly crystallizing as it cooled below the surface of the Earth.

While stone from Academy has long been known as 'black granite' in the commercial stone trade, geologically speaking the black stone from the Academy formation is actually a mafic stone and not a true granite. Academy granite is not a true 'black granite' but a gabbro. Gabbros similar to those from Academy cover about 60% of the earth's surface, mostly under the seafloors.

Descripción: Academy Black Granite, una roca de "granito" negro de primera calidad. Este material es excepcional. por su calidad de color, dureza y trabajabilidad. Seleccionamos a mano estos negros. cantos rodados de granito de la cantera. Este material rocoso es muy caro y no para la mayoría de los presupuestos. Los granitos Academy varían desde casi negro hasta gris oscuro. la oscuridad El color gris a negro del granito permite un excelente contraste entre los pulidos. y rostros sin pulir. El granito de color gris oscuro a negro de la Academia estaba formado por El magma cristaliza lentamente a medida que se enfría debajo de la superficie de la Tierra.

Mientras que la piedra de la Academia se conoce desde hace mucho tiempo como "granito negro" en el comercio de piedra, geológicamente hablando, la piedra negra de la Academia La formación es en realidad una piedra máfica y no un verdadero granito. El granito Academy no es un verdadero 'granito negro' sino un gabro. Gabros similares a los de la portada de Academy. alrededor del 60% de la superficie terrestre, principalmente bajo el fondo marino.

Size: Commonly available from 18 inches minus or 5 feet
