

Name:	California Gold Rock Boulders
Origin:	Southern California quarry
Geology:	N/A
Color:	Gold to tan color
Description:	The California Gold Rock product provides a really good neutral color ground cover material for planter beds in the landscape to contrast other bold materials against. This rock is typically 95% or more gold to tan rock with random pieces of lavender rock showing up as a result of the process of quarrying natural rock materials.
Descripción:	El producto California Gold Rock proporciona un muy buen material de cobertura de suelo de color neutro para maceteros en el paisaje para contrastar otros materiales audaces. Esta roca es típicamente 95% o más de oro a roca bronceada con piezas aleatorias de roca lavanda que aparecen como resultado del proceso de extracción de materiales de roca natural.
Size:	Commonly available from 12 inches through 4 feet, specimens through 6 feet
Transportation:	Large orders shipped in End-dump and Super 10 trucks. Smaller orders shipped on flatbeds
