

Gold Polished Pebbles

Gold Polished Pebbles

Product Description and Specification

Name:	Gold Polished Pebbles
Geology:	Quarried beach stone
Color:	Gold
Description:	Beach cobbles, pebbles and crivea are used in a variety of large commercial landscape and hardscape projects, such as hospitals, hotels, resorts, high rise buildings, municipalities, and airports. In residential landscape and hardscape, beach pebbles are used from small projects (such as planters and flower beds), large projects (such as driveways, walls, patios, decks, tree circles and water-smart gardens), and everything else in condos, designer homes, and elaborate mansions. The glossy smooth surface makes polished beach and river pebbles ideal for ground cover, walkways, driveways, outdoor and indoor planters, dry river beds and ponds.
Descripción:	Los adoquines de playa, guijarros y crivea se utilizan en diversos proyectos comerciales de paisajismo y superficies duras, como hospitales, hoteles, complejos turísticos, rascacielos, municipios y aeropuertos. En paisajismo y superficies duras residenciales, los guijarros de playa se utilizan en proyectos pequeños (como jardineras y parterres), proyectos grandes (como entradas de vehículos, muros, patios, terrazas, círculos de árboles y jardines con buen consumo de agua), y en todo tipo de condominios, casas de diseño y mansiones elaboradas. Su superficie lisa y brillante hace que los guijarros de playa y río pulidos sean ideales para cubrir el suelo, caminos, entradas de vehículos, jardineras exteriores e interiores, lechos de ríos secos y estanques.
Transportation:	Orders shipped on flatbeds

Sizes of Material

Pallet Baskets: Available range from 1/2" through 2-1/2" sizes Per 50 Lbs
