

It's the Same Rock. Why Pay More?

Golden Queen Granite 3/4"

Product Details

Name: Golden Queen Granite

Origin: Northern California Quarry

Geology: Granite

Color: Rich Golden Color

Description: Most likely the strongest most richly colored golden colored crushed granite gravel quarried in California. Filled with bold gold colored quartz contrasting with a lot of black feldspar, this rock sparkles in the sunshine to show off the color qualities of this rich natural granite / quartz material. Makes for an excellent pathway, driveway and parking area and ground cover material in landscapes. This is the gold granite rock used from Ventura County through the Northern California Wine Country. Some material yards in the Bay Area deceptively sell this as "Desert Gold" others call it California Gold Rock or Handley Gold Rock.

Descripción: Probablemente la grava de granito triturado dorado más resistente y de color intenso extraída en California. Rellena de un intenso cuarzo dorado que contrasta con abundante feldespato negro, esta roca brilla a la luz del sol, realzando las cualidades cromáticas de este rico material natural de granito/cuarzo. Es excelente para caminos, entradas de vehículos, aparcamientos y como material de cobertura vegetal en jardines. Esta roca de granito dorado se utiliza desde el condado de Ventura hasta la región vinícola del norte de California. Algunos depósitos de materiales en el Área de la Bahía la venden engañosamente como "Oro del Desierto", mientras que otros la llaman Roca Dorada de California o Roca Dorada de Handley.

Transportation: Large orders shipped in End-dump and Super 10 trucks. Smaller orders shipped on flatbeds
