

Product Description and Specification

Name: TechniSoil G3 Pro Pathway Stabilizer

Geology: 100% Non Toxic Organic formulation of psyllium fiber wet liquid

Description: TechniSoil G3 - Pathway Stabilizer is a liquid polymer stabilizer for natural decomposed granite pathways and patios. It provides cross-linking stability and reduces dust and tracking of loose materials on residential and light commercial foot traffic applications. G3 is environmentally friendly, VOC-free, and safe for use around people, animals, and landscaping. Primarily used for paths, walkways, and driveways, this sophisticated material is a that packs extremely well. Its rustic, natural appearance is a beautiful complement to landscapes and provides a stable base that can be treated with polymers to set the color and reduce track-ability, or can be left as is for an organic, high-end feel. Common applications of Stabilized Decomposed Granite and Crushed Stone Fines include hiking trails, bike paths, fire lanes, garden paths, patios or any other application that want a natural looking surface.

- Eco-friendly, VOC-free, safe around plants and animals
- Create beautiful, natural surface pathways and patios
- Works best with 1/4" minus or 3/8" minus decomposed granite and crushed stone fine materials
- Excellent for commercial and residential D. G. paving applications
